Online Learning

Participants Data Privacy Notice

What information is being collected?

The information we are collecting and processing includes:

- First name

- Surname

- Signature (typed out name) and date of signature

- Address including city/town and post code

- Date of birth and related age range

- Phone number

- Email address

- Gender identity (please note this information is optional and only with your consent will this be associated with your personal information)

- Ethnicity (please note this information is optional but if provided will not be associated with your personal information)

Version 21st of November 2023

- Why you are wanting to take part in the workshops
- What you are wanting to achieve by taking part in the workshops
- Whether there are any barriers that might affect your participation in the workshops and details of this if so
- What device you will be using to attend the online workshops
- Agreement to the FreeTech Project Code of Conduct for Participants
- What IT/technology topics on a list provided during the sign up form (this will change depending on the course content) you have some knowledge of – with the same question asked at the end of the course, alongside asking for any comments and reflections regarding this, via a survey to assist with the evaluation. This will be associated with your name so the evaluation can take place but the information will not be linked to your name when sharing with funders etc. without your consent.
- Whether you have taken part in any of the following before: in person IT/technology workshops; online IT/technology workshops; online meetings/chats (e.g. via Zoom) with family and friends; online meetings/chats (e.g. via Zoom) for work; online meetings/chats (e.g. via Zoom) for community/voluntary groups; online forum; none of these
- How your heard about the workshops

Version 21st of November 2023

- Photo and video permission
- Attendance at workshops - including evaluating how many participants that attended our introductory Zoom workshops also attended our main project online workshops
- Feedback/information on the project via online surveys, potentially including your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology, internet, social media, privacy and security skills and knowledge alongside confidence, social interaction, mental health and well-being, communication/contact with others and access to support services have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation you are involved with, made new friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see covered in future FreeTech Project workshops. Feedback via these surveys will be anonymous.
- Feedback/information on the introductory Zoom workshops via an online survey, potentially including what you have most enjoyed, least enjoyed, learnt and whether your technology

and internet skills and knowledge alongside confidence, social interaction, mental health and well-being and communication/contact with others have improved and where relevant whether you will be doing anything differently after the workshop, including using technology differently, using new skills and knowledge in another group/organisation you are involved with, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities. Feedback provided by this survey will be anonymous.

- Feedback/information on the open source focused projects via online surveys, potentially including your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology and internet skills and knowledge, social interaction, mental health and well-being, control and confidence in using your technology and over your personal data, alongside your confidence in and knowledge of free and open source technology, privacy and security and reusing technology have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation you are involved with, made new

friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see covered in future FreeTech Project workshops. Feedback via these surveys will be anonymous.

- Ongoing feedback, suggestions, comments and/or issues you would like to raise with us as an organisation regarding your online learning.

- We may ask you to be part of an interview that will form a case study example of the impact our services can have upon those engaged – if you agree, we may ask you to complete a data protection consent form.

- We will record details of any phone conversations where support and advice has been provided to evidence outcomes, including: support to attend an online workshop; support to join the FreeTech Forum; and joining a FreeTech Project workshop. This will not be associated with your name or any other personal details.

- Analysis of any polls/questions conducted on the FreeTech Forum. This will not be associated with your name or any other personal details.

- Analysis of the FreeTech Forum/Discourse statistics, including: Date of review; Consolidated Pageviews; Signups; Topics; Posts; DAU/MAU; Daily engaged users; New contributors; Top

referred topics; and, Trending search terms. This will not be associated with your name or any other personal details.

- Analysis of FreeTech Forum posts and engagement. This will not be associated with your name or any other personal details without obtaining your consent.

- Analysis of video tutorial statistics, including: date of review; name of video; views; comments (qualitative comments and quantitative amounts); shares; and, likes. This will not be associated with your name or any other personal details.

- Analysis of how people got in contact with us about the project, including: project name (if relevant); and whether they got in touch via newsletter, phone, email, social media (specifying which one), our website, post or other (specifying details). This will not be associated with your name or any other personal details.

- Reflections from tutors after each workshop to evidence social impact. Whilst this may help us create case study examples, no case study will be associated with the person's name without consent.

- There may also be reviews by the Workshop Facilitators and Research and Development Officer of the project half way through and at the end of the project (varying depending on the length of the project), reflecting on the evaluation and feedback obtained to learn and grow as an organisation

alongside assisting with our monitoring requirements with funders. Evaluation methods used as part of this review may include interviews and surveys with Workshop Facilitators. Information from these reviews, where relevant, will not be associated and shared with your name or any other personal details without your consent.

- Accident and incident reports are done where relevant too.

- Details of any safeguarding concern (if relevant) by completing our Incident Report Form found in our Safeguarding Adults at Risk policy, including providing GP practice (if known).

- Sometimes our evaluation process has to respond to very specific project outcomes and evaluation requirements from our funders – for instance, a grant responding to the climate crisis – and our survey design can sometimes be more specific to these project outcomes and requirements, and thus not every question that might feature as part of our evaluation surveys is covered as part of this data privacy notice. Sometimes the questions included as part of this data privacy notice might be modified to meet this same purpose of responding to specific project outcomes and evaluation requirements from our funders. Nevertheless, any answers you provide via our surveys will be anonymous and thus will not be associated with your personal data – if for any reason

the data is not anonymous, we will not associate your answers with your personal information/data without your consent.

Who is collecting it?

The FreeTech Project, which is the trading name of Libre Digital Limited, are collecting and processing this information.

How is it collected?

We will analyse how you get in contact with us about any of our projects, including recording the project name you are interested in attending (if relevant) and whether you got in touch via replying to our newsletter or by phone, email, social media (specifying which one), our website, post or another way (specifying details). This information will not be associated with your name or any other personal details. This will be recorded via a digital Libre Office Writer document on a FreeTech Project laptop, password protected and stored in FreeTech Project's cloud storage.

To register to attend a project and thus the online workshops and access the FreeTech Forum, you will be asked to complete an online sign-up form created by Nextcloud Forms. The sign-up form has been designed to ensure that we can provide the most

inclusive, safe and enjoyable learning experience possible through the online workshops and the FreeTech Forum.

The project sign-up form will ask for relevant personal and contact information alongside including questions that will help us understand why you are wanting to attend the workshops and what you are aiming to achieve through participation. The sign-up form provides space for you to provide us details of any barriers that might affect your participation in the workshops and it will ask you to provide us with details of the device/technology you are planning to use to access and attend the online workshops so we can provide additional support where possible.

As part of the sign-up form, you will be asked to agree to adhere to the FreeTech Project Code of Conduct for Participants – if you do not agree we will not accept you as a participant onto the project. This is because the Code of Conduct for Participants is very important for us as an organisation to ensure that we can provide a safe, inclusive and enjoyable learning environment whilst meeting our organisation's ethos and remit. The sign-up form will also ask you about your previous engagement with IT/technology workshops and online meetings/chats and forums to help us evaluate if participants are accessing new services and activities through our projects. In addition, you will be asked about what IT/technology

topics on a list included in the sign up form (this will change depending on the course content) you have some knowledge of helping us design and evaluate the course.

The sign-up form will include an image release which you can complete if you consent to FreeTech Project using still and moving images of you attending the workshops with these potentially shared through our publicity and online via our social media and website etc. or with funders who may also share them via their networks and publicity. Imagery will be taken/produced through either video and/or audio recording the online workshops via Zoom cloud storage and external video recording sources (e.g. a professional camera or a phone camera) or by taking screenshots of this footage or during the live online workshops. This imagery will be stored on FreeTech Project's laptop(s) and related cloud storage and may also be saved to (an) external harddrive(s) – with imagery, where relevant, first downloaded from our Zoom cloud storage to do this. Furthermore, FreeTech Project sometimes contracts in freelance videographers who, after completing a data processing agreement, will have access to this imagery taken/produced – or take/produce it themselves, including through their own Zoom account and related cloud storage and downloading from there – and thus this may involve them storing imagery on their own laptop(s) and related cloud storage and/or (an) external

harddrive(s), deleting once the work/project is complete and they have transferred completed work to FreeTech Project, as specified in their data processing agreement. We will let you know if and how images, video and/or audio recordings will be used where relevant. If you do not provide us with your consent we will make sure no images, video and/or audio footage of yourself is included in anything that will be publicly shared, with all footage deleted from the FreeTech Project's (and a contracted freelancer's, if relevant) Zoom cloud, laptop(s) and related cloud storage and external harddrive(s) once edited for distribution in line with consent. Imagery taken/produced as part of our projects will be stored in line with image release consent on/in FreeTech Project's laptop(s), cloud storage and/or external harddrive(s) indefinitely, and also may be available online e.g. our website e.g. our PeerTube.

Also as part of the sign-up form, we will ask how you heard about the workshops which will help us better promote the workshops and engage more participants. The sign-up form will also sometimes include additional data protection questions that relate to project specific requirements depending on what funders have asked us to do as part of their terms and conditions of receiving funding.

To join our introductory Zoom workshops there is a separate sign-up form to complete that asks the same questions and collects the

Version 21st of November 2023

same information as the main project sign-up form explained above, except it asks specifically about the introductory Zoom workshop rather than the main project online workshops. This means that if a participant wants to attend a introductory Zoom workshop and the main project online workshops they would need to complete two online sign-up forms.

If there are no places available on our current projects or you are interested in attending a FreeTech Project workshop but we currently have no workshops for your area, we will ask you to complete a FreeTech Project Workshops Waiting List survey, which will provide us with your name and contact details so that we can get in touch with you if online FreeTech Project workshops become available near you, alongside obtain evidence of demand for workshops in different areas to assist with funding applications. There will be data protection questions that you will need to complete to ensure we have your consent to collect and process the details you provide. Given there are a limited number of places on the online workshops, if you do not attend a workshop for several weeks and we have not been told of the reason why, we may contact you and/or potentially remove you from the course to allow someone on the waiting list to attend instead.

Version 21st of November 2023

We then categorise data provided via the sign-up surveys to create attendance registers for the relevant projects that contain information regarding those who have registered to attend the project workshops, which the Workshop Facilitators will utilise on a weekly basis to maintain a record of attendance and which will also be used to provide information to the funders. Where relevant, analysis of attendance will include evaluating how many participants that attended our introductory Zoom workshops also attended our main project online workshops. Some funders have their own specific attendance registers they ask us to complete as well. We will also create a waiting list register so we can keep a record of those interested in taking part in FreeTech Project workshops to assist with funding applications and also to easily be able to contact those interested in attending if workshops become available near them. This will be recorded via a digital Libre Office Writer or Libre Office Spreadsheet document on a FreeTech Project laptop, password protected and stored in FreeTech Project's cloud storage.

We will use your email address to send you information about the project and our activities, including: how to join the online workshops, with additional advice and guidance provided where possible, and relevant evaluation e.g. online surveys to complete. We will use Mailchimp to send emails about the project, with your

name and email address stored in our Mailchimp account during the project and deleted from our Mailchimp account once the project is complete. You will learn how to join and use the FreeTech Forum through attendance on the main project online workshops.

For the main project online workshops evaluation process, this will partly involve us asking you to complete two online surveys – the first survey we will ask you to complete half way through the project and the second survey we will ask you to complete at the end of the project. The surveys may include asking you about your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology, internet, social media, privacy and security skills and knowledge alongside confidence, social interaction, mental health and well-being, communication/contact with others and access to support services have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation you are involved with, made new friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see covered

in future FreeTech Project workshops. Feedback provided by these surveys will be anonymous.

For open source focused projects, the process will be the same but the online surveys will ask slightly different questions potentially including asking you about your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology and internet skills and knowledge, social interaction, mental health and well-being, control and confidence in using your technology and over your personal data, alongside your confidence in and knowledge of free and open source technology, privacy and security and reusing technology have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation you are involved with, made new friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see covered in future FreeTech Project workshops. Feedback via these surveys will be anonymous.

Version 21st of November 2023

At the end of the project, we will again ask via a survey the same question we did in the sign up form regarding what IT/technology topics on a list provided (this will change depending on the course content) you have some knowledge of – alongside asking for any comments and reflections regarding this. This will be associated with your name so the evaluation can take place but the information will not be linked to your name when sharing with funders etc. without your consent.

There is also an online survey that will be open throughout the project to provide an opportunity and space for you to submit ongoing feedback, suggestions, comments and/or raise any issues with us as an organisation regarding your online learning.

Near the end of the project, we may ask you to be part of an interview, which would take place over the phone, email and/or video chat, that will form a case study example of the impact our services can have upon those engaged – if you agree, we may ask you to complete a data protection consent form that would be accessed as an online survey. These case studies may be shared in our own publicity and online and/or with funders who may also share them online and via their own publicity/networks.

As part of the introductory Zoom workshop evaluation we will ask participants to complete a survey after attending that asks about what you have most enjoyed, least enjoyed, learnt and whether your technology and internet skills and knowledge alongside confidence, social interaction, mental health and well-being and communication/contact with others have improved and where relevant whether you will be doing anything differently after the workshop, including using technology differently, using new skills and knowledge in another group/organisation you are involved with, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities. Feedback provided by this survey will be anonymous.

Over a project, we may also record details of any phone conversations with you where support and advice has been provided to you evidence project outcomes, including: support to attend an online workshop; support to join the FreeTech Forum; and joining a FreeTech Project workshop. This will be collected via an online survey completed by a FreeTech Project worker who provided the over the phone support. This will not be associated with your name or any other personal details.

Please note that on all our sign-up surveys and online feedback surveys asterisks mean an answer to that question is required.

Version 21st of November 2023

Once a survey has been completed – so that includes sign-up surveys, waiting list surveys, and evaluation/feedback surveys - your answers will be stored on FreeTech Project's Nextcloud Forms account. Waiting list survey data will be transferred to the waiting list register and deleted from Nextcloud Forms as soon as possible after the waiting list form has been completed. All other data will be deleted from Nextcloud Forms, at the latest, at the end of the related project.

Other processes that may form part of our project evaluation include: analysis of any polls/questions conducted on the FreeTech Forum, with these polls and questions most likely happening after workshops; analysis of the FreeTech Forum admin statistics; analysis of online video tutorial engagement; and, analysis of FreeTech Forum posts and engagement. None of this data will be associated with your name or any other personal details without obtaining your consent. This will be recorded via a digital Libre Office Writer or Libre Office Spreadsheet document on a FreeTech Project laptop, password protected and stored in FreeTech Project's cloud storage.

Workshop Facilitators will provide weekly reflections to the Research and Development Officer on what they have covered during the workshops and include any notable feedback regarding

Version 21st of November 2023

participants' development. This, alongside the survey data, will be used to produce relevant case studies for funders, evidencing the impact the funding has, but this will not be associated with your name or any personal details without your consent.

This evaluation collected will be analysed on a monthly basis, with this process led by the Research and Development Officer. This data will be used to ensure ongoing reflection and adaption of our online learning provision, provided to funders as part of our monitoring requirements and potentially used to create FAQs where needed. There may also be a review by the Workshop Facilitators and Research and Development Officer of the project half way through and at the end of the project (varying depending on the length of the project), reflecting on the evaluation and feedback obtained to learn and grow as an organisation alongside assisting with our monitoring requirements with funders. Evaluation methods used as part of this review may include interviews and surveys with Workshop Facilitators. Also part of this reflection, adaption and evaluation process, the Board of Directors and contracted freelancers may make use of the Social Impact Measurement Toolbox, which is an interactive online tool; you can learn more about the Toolbox by visiting this link: https://seee.co.uk/what-we-do/social-impact-toolbox/ Everyone who has access and uses the Toolbox will do so in accordance with signed data processing

Version 21st of November 2023

agreements. Personal data of data subjects, such as participants, will only be used in the Toolbox when unidentifiable and anonymised, and if not unidentifiable and anonymised, only if consent has been obtained. The Social Impact Measurement Toolbox was created by Social Enterprise East of England – please see their data privacy notices and/or retention policies for more on how your personal information will be collected and processed by Social Enterprise East of England.

This data privacy notice is based on our ideal project evaluation and so we may not always follow the same evaluation process, e.g. for shorter projects we may reduce the online survey feedback to one rather than two surveys, but we will only use evaluation methods included and explained in this data privacy notice.

Sometimes our evaluation process has to respond to very specific project outcomes and evaluation requirements from our funders – for instance, a grant responding to the climate crisis – and our survey design can sometimes be more specific to these project outcomes and requirements, and thus not every question that might feature as part of our evaluation surveys is covered as part of this data privacy notice. Sometimes the questions included as part of this data privacy notice might be modified to meet this same purpose of responding to specific project outcomes and evaluation

Version 21st of November 2023

requirements from our funders. Nevertheless, any answers you provide via our surveys will be anonymous and thus will not be associated with your personal data – if for any reason the data is not anonymous, we will not associate your answers with your personal information/data without your consent.

We will summarise the data before deleting from our company laptops, related cloud storage and external harddrive(s) if applicable for funding and evaluation purposes, making sure all data is unidentifiable and anonymised, unless requested by the funders and/or to fulfil legal requirements and we have obtained your consent where relevant/possible. As an exception, we will keep copies of image release forms, code of conduct agreements and data protection consent forms by print screening and saving this from Nextcloud Forms, but make sure print screens are password protected and stored on FreeTech Project laptops and our related cloud storage. We will also keep a record of people that have completed our FreeTech Project Workshops Waiting List Survey, removing people's details once they have been contacted regarding workshops in their area if available, or if the person requests their details are removed – this will be stored on our company laptops and cloud storage system and will be password protected. You can withdraw your consent at any time by contacting us via the details included below within the "Data Controller" section. However,

please note that sometimes consent cannot be withdrawn once data/information has been shared with funders.

How will it be used?

We collect and process this data for several reasons, including:

Purpose	Personal information used	Lawful basis
For evaluation purposes to pass onto our funders.	- City/town/post code - Age range - Gender identity - Ethnicity - Why you are wanting to take part in the workshops - What you are wanting to achieve by taking part in the workshops - Photo and video permission - Attendance at workshops - including evaluating how many participants that attended our introductory Zoom workshops also attended our main project online workshops	We have a legitimate interest to collect this information to be able to perform and administer our contract with the grant funder of the project/workshops – if we are unable to comply with our contract

	• Feedback/information on the project via online surveys, potentially including your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology, internet, social media, privacy and security skills and knowledge alongside confidence, social interaction, mental health and well-being, communication/contact with others and access to support services have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation	and associated terms and conditions we may be asked to repay the grant and face difficulties being funded again in future. All data shared with the funders will be anonymised unless requested and if it is requested we will make you aware of this and ask for your consent in most cases and if we can't ask for your

| | | you are involved with, made new friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see covered in future FreeTech Project workshops. Feedback via these surveys will be anonymous.

• Feedback/information on the open source focused projects via online surveys, potentially including your thoughts re the online workshops and the FreeTech Forum, what you have most enjoyed, least enjoyed, learnt and whether your technology and internet skills and knowledge, social interaction, mental health and well-being, control and | consent, we will explain why. |

| | | confidence in using your technology and over your personal data, alongside your confidence in and knowledge of free and open source technology, privacy and security and reusing technology have improved and where relevant whether you will be doing anything differently after the project, including being involved in sustaining the community group once we have left, using technology differently, using new skills and knowledge in another group/organisation you are involved with, made new friends, continuing to develop your skills and knowledge and/or accessing any new services and/or community activities alongside any suggestions for IT/technology topics you would like to see | |

	covered in future FreeTech Project workshops. Feedback via these surveys will be anonymous. • Feedback/information on the introductory Zoom workshops via an online survey, potentially including what you have most enjoyed, least enjoyed, learnt and whether your technology and internet skills and knowledge alongside confidence, social interaction, mental health and well-being and communication/contact with others have improved and where relevant whether you will be doing anything differently after the workshop, including using technology differently, using new skills and knowledge in another group/organisation you are involved with, continuing to develop your skills

	name or any other personal details without your consent.	

In some cases there will be a legal, contractual or other requirement or obligation for you to provide us with your personal information. If you do not provide us with the requested personal information we may not be able to admit you as a FreeTech Project participant. For other personal information you may not be under an obligation to provide it to us, but if you do not provide it then we may not be able to properly provide the service.

Where you have given us your consent to use your personal information in a particular manner, you have the right to withdraw this consent at any time, which you may do by contacting us as described in the "Data Controller" section below.

Please note however that the withdrawal of your consent will not affect any use of the data made before you withdrew your consent and we may still be entitled to hold and process the relevant personal information to the extent that we are entitled to do so on bases other than your consent. Withdrawing consent may also have the same effects as not providing the information in the first place.

Version 21ˢᵗ of November 2023

Who will it be shared with?

The FreeTech Project, which is the trading name of Libre Digital Limited, may share the data with the following groups/people/organisations:

- FreeTech Project's Board of Directors – for evaluation, monitoring and legal compliance e.g. safeguarding
- FreeTech Project's freelance workers – for project delivery, evaluation, monitoring and legal compliance e.g. safeguarding
- FreeTech Project's volunteers – for project delivery
- FreeTech Project's accountants – for legal accounting compliance; making sure all data is unidentifiable and anonymised, unless requested by the accountants and/or to fulfil legal requirements and we have obtained your consent where relevant/possible e.g. images.
- Funders of FreeTech Project – for fulfilling specific funder contracts and terms and conditions, especially around monitoring
- Relevant agencies such as Adult Social Care if necessary to fulfil legal obligations

Anyone using this data - if it is not unidentifiable and anonymised - will be asked to sign a contract agreeing to follow correct protocols

Version 21st of November 2023

when accessing and using the data. This may not be the case if we need to share this data to fulfil legal obligations.

Retention Period

We will summarise the data before deleting from our company laptops, related cloud storage and external harddrive(s) if applicable for funding and evaluation purposes, making sure all data is unidentifiable and anonymised, unless requested by the funders and/or to fulfil legal requirements and we have obtained your consent where relevant/possible. As an exception, we will keep copies of image release forms, code of conduct agreements and data protection consent forms by print screening and saving this from Nextcloud Forms, but make sure print screens are password protected and stored on FreeTech Project laptops and our related cloud storage. We will also keep a record of people that have completed our FreeTech Project Workshops Waiting List Survey, removing people's details once they have been contacted regarding workshops in their area if available, or if the person requests their details are removed – this will be stored on our company laptops and cloud storage system and will be password protected.

Imagery will be taken/produced through either video and/or audio recording the online workshops via Zoom cloud storage and

external video recording sources (e.g. a professional camera or a phone camera) or by taking screenshots of this footage or during the live online workshops. This imagery will be stored on FreeTech Project's laptop(s) and related cloud storage and may also be saved to (an) external harddrive(s) – with imagery, where relevant, first downloaded from our Zoom cloud storage to do this. Furthermore, FreeTech Project sometimes contracts in freelance videographers who, after completing a data processing agreement, will have access to this imagery taken/produced – or take/produce it themselves, including through their own Zoom account and related cloud storage and downloading from there – and thus this may involve them storing imagery on their own laptop(s) and related cloud storage and/or (an) external harddrive(s), deleting once the work/project is complete and they have transferred completed work to FreeTech Project, as specified in their data processing agreement. We will let you know if and how images, video and/or audio recordings will be used where relevant. If you do not provide us with your consent we will make sure no images, video and/or audio footage of yourself is included in anything that will be publicly shared, with all footage deleted from the FreeTech Project's (and a contracted freelancer's, if relevant) Zoom cloud, laptop(s) and related cloud storage and external harddrive(s) once edited for distribution in line with consent. Imagery taken/produced as part of our projects will be stored in line with image release consent on/in

Version 21st of November 2023

FreeTech Project's laptop(s), cloud storage and/or external harddrive(s) indefinitely, and also may be available online e.g. our website e.g. our PeerTube.

You can withdraw your consent at any time by contacting us via the details included below within the "Data Controller" section. However, please note that sometimes consent cannot be withdrawn once data/information has been shared with funders.

After a project is complete, we will archive your email address and name in our Mailchimp account in the related project's contact list (this will not be possible if you are signed up on another project, with us only able to archive your email once you are no longer part of any of our projects/workshops – also, if you are signed up to our organisation's newsletter, we will not archive your email from that contact list as part of this process, please see Libre Digital's Newsletter Data Privacy Notice for more). The other option is to delete the email address and name from our Mailchimp account permanently, but we will only do this if you ask us to because once this action has been taken we are unable to add the same email address into Mailchimp and thus if the participant signed up to a new project we would not be able to add their email address into Mailchimp to add to the project email newsletter. To add someone's email address back into Mailchimp after it has been permanently

Version 21ˢᵗ of November 2023

deleted would require a new sign up form created via Mailchimp that the participant would need to complete, which would create barriers to engagement for participants and therefore this is something we want to avoid unless absolutely necessary. Please see Mailchimp's own data privacy policies and/or retention policies for more on how your personal information will be collected and processed via Mailchimp.

Please see Zoom's own data privacy notices and/or retention policies for more on how your personal information will be collected and processed via Zoom. Alongside Zoom cloud, FreeTech Project uses Nextcloud and Mega cloud storage systems – please see their data privacy notices and/or retention policies for more on how your personal information will be collected and processed by Nextcloud and Mega. Also, when we contract freelancers in, they may store data via other cloud storage systems such as Dropbox and Google who have their own data privacy notices and/or retention policies – any freelancer who has access to personal information will be asked to complete a data processing agreement and store, process and delete data in accordance with this.

Waiting list survey data will be transferred to the waiting list register and deleted from Nextcloud Forms as soon as possible after the waiting list form has been completed. All other data will be deleted

Version 21st of November 2023

from Nextcloud Forms, at the latest, at the end of the related project, with data analysed and summarised for purposes outlined in this data privacy notice. Please see Nextcloud Forms' own privacy policy for more information regarding how they collect and process data.

Funders often have specific terms and conditions relating to data collection and processing and their data privacy notices and retention policies can be accessed by contacting them or they are also usually available on their websites. We are required to retain data collected and processed as part of Coalfields Regeneration Trust funded projects for a minimum of six years after the project has finished and share this data with the Trust if requested. Any beneficiary names shared with Coalfields Regeneration Trust will only be used for monitoring purposes and to follow Value Insight methodology. The names will not be used for any other purpose unless permission from the individual has been received. We are required to retain data collected and processed as part of National Lottery funded projects for seven years afterwards and provide the National Lottery on request with copies of those records.

Case studies may be shared in our publicity and online via our social media and website etc. and/or with funders who may also share via their publicity documents, website, and social media etc.

Version 21st of November 2023

unless you withdraw your consent. However, please note that sometimes consent cannot be withdrawn once data/information has been shared with funders.

Some documents, such as those relating to safeguarding, will be kept indefinitely with us having a legal responsibility to pass this to the relevant local authority's safeguarding department if the organisation is dissolved, for instance.

Data Subjects Rights

The GDPR provides the following rights for individuals:

1. The right to be informed
2. The right of access
3. The right to rectification
4. The right to erasure
5. The right to restrict processing
6. The right to data portability
7. The right to object
8. Rights in relation to automated decision making and profiling.

For more, see here: https://ico.org.uk/for-organisations/guide-to-the-general-data-protection-regulation-gdpr/individual-rights/

Version 21st of November 2023

Data Controller

The data controller is the FreeTech Project, which is the trading name of Libre Digital Limited.

Address of data controller: Libre Digital, The Circle, 33 Rockingham Lane, Sheffield, S1 4FW

Email: info@libredigital.org

Website: https://www.freetechproject.com

Key contact from the FreeTech Project to talk to regarding data protection matters is Jane Watkinson, Research and Development Officer, jane@libredigital.org

Other key contacts:

Ka Man Shing, Secretary and Director, kaman@libredigital.org

Reuben Clarke, Treasurer and Director, reuben@libredigital.org

Heather Paterson, Chair and Director, heather@libredigital.org

Derek Hatton, Director, dez@libredigital.org

Abdi Hassan, Director, abdi@libredigital.org

How to complain

If you have any concerns about our use of your personal information, you can make a complaint to us using the contact information provided in the "Data Controller" section above.

You can also complain to the ICO if you are unhappy with how we have used your data. The ICO's address is:

Information Commissioner's Office

Wycliffe House

Water Lane

Wilmslow

Cheshire

SK9 5AF

Helpline number: 0303 123 1113

ICO website: https://www.ico.org.uk

FreeTech Project is registered with the Information Commissioner's Office as an organisation that processes personal data and adheres to all required data protection regulations.
